

Job Title: Small Water Systems Operator

Job Type: Full-time

Salary: Commensurate with experience

Job Summary:

We are seeking a skilled and reliable Small Water Systems Operator to join our team. The successful candidate will be responsible for operating, maintaining, and repairing small water systems in West Denver, Colorado. The ideal candidate will have experience with water treatment and distribution systems, a strong work ethic, and a commitment to ensuring the safety and quality of our water supply.

Key Responsibilities:

- Operate and maintain small water systems in compliance with state and federal regulations.  
Perform routine maintenance on water treatment and distribution systems, including pumps, valves, and motors.  
Monitor water quality and conduct regular water testing to ensure compliance with state and federal regulations.  
Respond to customer inquiries and complaints regarding water quality and service issues.  
Operate and maintain laboratory equipment to perform water quality tests.  
Maintain accurate records of water treatment and distribution activities.  
Perform basic plumbing and electrical repairs as needed.  
Assist with the installation of new water treatment and distribution systems.  
Participate in training and continuing education to stay current with industry standards and regulations.  
Operate company vehicles and equipment in a safe and responsible manner.  
Adhere to all safety policies and procedures.

Qualifications:

- High school diploma or equivalent required; additional education in water treatment or a related field preferred.  
Minimum of 2 years of experience in water treatment and distribution systems.  
Possession of a valid Colorado Water Treatment Plant Operator or Distribution System Operator certification preferred
